Professional summary

- Enthusiastic and results-driven **Python Developer** with a strong foundation in Computer Science Engineering and practical experience in full-stack web development, backend engineering, and AI/ML applications.
- Proficient in **Python, Django, HTML, CSS, JavaScript, MySQL, and SQLite**, with hands-on experience developing web applications and AI-based projects.
- Strong understanding of **OOP, CRUD operations, REST APIs, database management, and software development practices**.
- Experienced in using AI-powered development tools such as **ChatGPT, Claude AI, GitHub Copilot, Cursor, and AI Agents** for code generation, debugging, documentation, productivity, and application development.
- Gained practical exposure through **internships and academic projects**, applying programming and problem-solving skills to real-world development scenarios.
- Quick learner with strong **problem-solving, teamwork, communication, and collaboration skills**, seeking to contribute as a **Software Developer** in an innovative and growth-focused organization.

Education

B. Tech in Computer Science Engineering, Sri Mittapalli College of Engineering (JNTUK) 2022 – 2026 | CGPA: 7.71

Skills

- **Programming Languages:** Python, JavaScript, SQL
- **Frontend Technologies:** HTML5, CSS3, JavaScript, ReactJS, Bootstrap, Tailwind CSS
- **Backend Technologies:** Django, REST APIs, CRUD Operations, API Integration
- **Databases:** MySQL, SQLite
- **Developer & AI Tools:** VS Code, Trae AI, ChatGPT, Claude AI, GitHub Copilot, Cursor, AI Agents
- **Version Control:** Git, GitHub
- **DevOps & Deployment:** CI/CD, Apache HTTP Server
- **Email & Office Tools:** HTML Email Creation, Responsive Email Templates, Email Campaign Development, Microsoft Office Suite, MS Excel, MS Word, PowerPoint, MS Outlook

Work experience

Python Developer Intern – Coding Brains (Remote) | Oct 2024 – Jun 2025

- Developed and **deployed 5+ Python applications** for automation and data processing, reducing manual effort by 40%.
- Designed and optimized RESTful APIs using **Django**, improving data exchange efficiency by 30%, while applying OOP, Data Structures, Algorithms, **exception handling**, and **debugging**.
- Analysed 10,000+ records using NumPy and Pandas for data preprocessing and insights, and created Matplotlib dashboards, optimizing algorithms to improve application performance by 25%.

AI & Machine Learning Intern – Inlignx Global Pvt. Ltd. (Remote) | Nov 2025 – Mar 2026

- Developed Machine Learning solutions using **Python, Pandas, NumPy, and Scikit-learn**, including data preprocessing, feature engineering, model training, and evaluation.
- Built an NLP-based text classification project using **NLP, text preprocessing, and feature extraction** techniques to analyze textual data and improve prediction performance.
- Implemented end-to-end ML workflows covering **model training, testing, evaluation, and performance optimization**.

Projects

Price Negotiating Chatbot with Text & Voice (AI & NLP)

- Developed an **AI-powered e-commerce Price Negotiation Chatbot** using **Python, Django, HTML5, CSS3, and JavaScript**, supporting text and voice-based customer interactions.
- Implemented a **dynamic price negotiation engine** using NLP and machine learning logic to evaluate offers, calculate discounts, and generate real-time counter-offers.
- Integrated **REST APIs and Web Speech API** for chatbot communication, voice processing, product browsing, cart management, and order processing.
- Designed **SQLite/MySQL database integration** for user authentication, products, negotiation sessions, chat history, offers, carts, and orders.

Language – English, Telugu
